OCAK İŞLETMESİ

PROJE UYGULAMA

## HAKKIMIZDA

Firmamız mermer sektöründeki faaliyetine, 1988 yılında Isparta'da mermer atölyeciliği ile başlamıştır.

Faaliyetlerimize projeli projersiz mermer montaj uygulamaları yaparak devam edilmiş, bu çalışmalar bölgemizde ve diğer illerimizde başarı ile yürütülmüş, yapılan her iş bir sonraki yapacağımız işin referansı olmuştur. Firmamız mermer üretimi satışı odaklı ilk fabrikasını 1997 yılında Isparta'da kurup faaliyete başlamıştır. Mermer montajı işimize üretimi de ilave ederek gerek yurt içi gerek yurt dışına ürün satışı yapar duruma gelmiştir. Bu yıllarda mermer çeşitliliğimiz fazla olmadığı için mevcut çalışan mermer ocakları ve firmalardan ham madde ve ürün tedarik edilerek, yapılan işlerimizde kullanılmıştır.

Firmamız mermer ocaklığına 2002 yılında Burdur ilinde almış olduğu ruhsatlı mermer ocağı ile başlayıp bu ocağı da 2005 yılında çalışır hale getirmiştir. Bu ocağımız faal halde olup yurt içi yurt dışı blok satışı yapan bölgenin verimli ocaklarından biri durumundadır.

Sektöre mermer montaj uygulamaları ile adım atan firmamız, buna fabrika ve ocak gücünü de dahil ederek sektördeki yerini almıştır. Bu geçen zaman içerisinde edindiğimiz tecrübelerimiz, bizleri sektörde bu işi iyi bilen ve layıkıyla yürüten bir firma haline getirmiştir.

Bu edindiğimiz tecrübeler bizleri daha modern üretim tesisi yapmaya teşvik etmiş,2015 yılında başlatmış olduğumuz yatırım planı ile plaka mermer üretimi ve ebatlı ürün yapacak tesisimizi 2017 yılında çalışır hale getirmiştir.

Fabrikamız günün son teknolojisi kullanılarak dizayn edilmiş, verimli ve zamanlı çalışma odaklı Türkiye'nin örnek tesislerinden biri haline gelmiştir.

Tesisimizde kendi ocaklarımızdan çıkardığımız blokların yanında ülkemizin değerli taş grupları işlenmekte ve satışa sunulmaktadır.

Firmamız mermer sektöründeki faaliyetlerine ocak, fabrika ve montaj uygulamaları ile devam etmektedir. Mermerin sadece plaka veya ebatlanmasının yeterli olmadığı görüldüğünden, montaj uygulamalarına da devam etmekteyiz. Mermerin dekore edilmiş son halinin güzelliğini bilen bir firma olarak, projeli her türlü işleri yürütmekteyiz. Firmamız yönetim ve üretim açısından yeterli tecrübeye olup, projeli projersiz mermer, granit ve doğal taşın üretim, satış, montaj aşamalarını yapabilmektedir. Bugüne kadar yapmış olduğumuz konut ve otel projelerimiz farkımızın ispatı olmuştur.

Firmamız iki adet açık bej, bir adet gri, bir adet fantastik brown ocağı olmak üzere dört adet faal ocağı ve tam entegre bir fabrikası ile sektörde itibarlı bir yere sahiptir. Firmamız bu yapısı ile Türkiye'nin ender firmalarından biri olup taş sanatı konusunda uzmanlaşmıştır.

Tecrübelerimizi siz değerli müşterilerimize sunmaya, farkımızı göstermeye bekleriz.

## ABOUT US

Our company started its activity in marble sector with marble workshop in Isparta in 1988.

Our activities continued with marble assembly applications. These studies have been carried out successfully in our region and other cities, every work that we did, has been the reference of the work we will do next.

We established our first factory which is focused on marble production in Isparta in 1997. We have been able to sell products to both domestic and international by adding marble production to our marble assembly applications. Since there was not much marble variety in these years, we have been used in our works by supplying the raw materials and products from the existing working marble quarries and companies.

Our company started marble quarrying by buying a licensed marble quarry in Burdur in 2002, and this quarry became operational in 2005. This quarry is active now and it is one of the productive quarries of the region that carries out domestic and international block sales.

Our company which started with marble assembly application, has taken its place in the sector by including its factory and quarry power. These experiences we have gained over the past years, have made us a competent and leading company in the sector.

These experiences have encouraged us to build more modern production facility. We made functional our facility where slab marbles and dimensional products are produced in 2017 by investment plan that we started in 2015.

Our factory has been designed by using the latest technology of the day, and it has become one of Turkey's example facility by efficient and time-oriented work.

In addition to the blocks that we have taken from our quarries, also our country's precious stone groups are being processed in our facility and sold. We continue our activities in the marble sector with quarry, factory and assembly applications. We continue with the assembly applications since we have seen that only the plate or dimensioning of the marble is not enough. By knowing the beauty of the decorated marble, all kinds of projects are carried out. Our company has sufficient experience in terms of management and production and is able to make production, sales and assembly stages of marble, granite and natural stone. Our residential and hotel projects that we have done so far, proved our difference.

Our company has made a reputation in the sector with a fully integrated factory and two light beige, one grey and one fantastic brown quarries. Our company has become one of the precious companies in Turkey and specialized in stone arts.

We wait for our dear valued customers to show our experience and difference.
